

NutriProZ

Longevity Program

Achieve vibrant longevity with personalized cellular nutrition.

This two-part personalized program uses your cellular micronutrient levels, genetics, and lifestyle to create supplements specific to your unique cellular needs.

Why Personalized Cellular Nutrition?

Individual differences in biochemistry, metabolism, genetics, lifestyle, and gut health result in vastly different nutritional needs.

One-size-fits-all supplements put you at risk of under or overdosing on vital vitamins and minerals.

But with our advanced cellular and genetic testing, you can receive the precise therapeutic dosages you need to take control of your cellular health.

How It Works

The NutriProZ Longevity Program is a two-part system that combines cellular nutrient and genetic testing with a comprehensive lifestyle assessment to develop optimized personalized supplements that improve biochemistry for increased health span.

Part I: Longevity Starter Plan

Part I assesses your lifestyle, genetics, and cellular nutrient levels to develop supplements that are perfectly suited to your unique nutrient needs.

1 Lifestyle Assessment

Our comprehensive lifestyle assessment gathers critical information about your diet, physical activity, sleep habits, medications, and more to understand your needs.

2 Cellular Genetic Nutrient Testing

Our advanced precision technology measures your genetics and micronutrient levels to optimize your nutrition at the by:

- Measuring direct levels of intracellular and extracellular micronutrients using white and red blood cells
- Identifying genetic variations that determine how your body absorbs and utilizes nutrients
- Determining the scope of genetic predispositions that can affect how your body and cells absorb, transport, convert, and receive nutrients

3 Interactive Personalized Report

After testing, you'll receive an interactive, detailed report that provides a complete picture of your nutritional needs, nutrient status, and personalized recommendations from your provider.

4 Personalized Cellular Nutraceuticals

You'll receive a 3-month supply of precision compound supplements formulated for your precise cellular needs, genetic profile, and lifestyle.

All supplements are:

- Produced in a US-based NSF-certified, FDA-registered, and GMP-registered facility
- Made-to-order with physician-grade ingredients to ensure freshness, absorption, and efficacy
- Compounded formulas, resulting in simplified doses that fit seamlessly into your routine

The Vibrant Wellness Difference

Vibrant Wellness is a leading CLIA-certified and CAP-accredited biotech company based in Santa Clara, CA. Our life-transforming lab testing helps you discover the **root cause of your symptoms to enable Vibrant longevity.**

- **Unparalleled specificity** and sensitivity. Lab tests run on a proprietary 3Dense microchip technology platform with Microarrays and Mass Spectrometry
- **Validated and accredited.** Science-backed testing and analysis based on peer-reviewed research featured in renowned international institutions
- **Trusted results.** Root-cause testing trusted by over 18,000 wellness professionals

Part II: Longevity Maintenance Plan

Part II uses **Micronutrient Testing** to further optimize your blend so you can maintain vibrant health.

1

Micronutrient Intra-and Extra-cellular Testing

After you complete the Starter Plan, your provider will measure your intra-and-extra cellular micronutrient levels to reveal if your nutrient needs have changed, including: vitamins, minerals, co-factors, amino acids, essential fatty acids.

2

Interactive Personalized Report

After micronutrient testing, you'll receive an updated interactive report detailing how your nutritional needs have changed and providing updated personalized recommendations from your provider.

3

Premium Personalized Cellular Nutraceuticals

You'll receive an additional 3 to 6-month supply of precision compound supplements, re-formulated as needed for your current micronutrient needs.
