

From anti-wrinkle to anti-inflammatory peptides, our potent formulations harness the rejuvenating potential of up to 50 peptides, **delivering visible results in as little as 14 days.**

Collagen Support

Peptide Name	How it Works
Myristoyl Hexapeptide-4	Stimulates collagen production and enhances skin repair processes to reduce the appearance of wrinkles
Myristoyl Hexapeptide-23	Stimulates collagen production and reinforces the skin's structural integrity to enhance elasticity and firmness
Hexapeptide-2	Brightens the skin and reduces dark spots by reducing melanin production
Myristoyl Pentapeptide-8	Reduces puffiness and edema around the eyes by enhancing lymphatic circulation and reducing water retention
Oligopeptide-10	Acts as an anti-microbial to support healthy skin, particularly for acne-prone and sensitive skin
Decapeptide-4	Boosts collagen synthesis to improve skin elasticity and firmness
Acetyl Heptapeptide 4	Strengthens the skin's natural microbiome barrier to enhance protection against environmental stressors
Palmitoyl Oligopeptide + Palmitoyl Tetrapeptide-7 (Blend)	Works synergistically to activate collagen production, supporting skin structure and health
Palmitoyl Hexapeptide-12	Enhances fibroblast activity for softer and more supple skin
Palmitoyl Oligopeptide	Stimulates collagen production and reinforces skin's structure to improve firmness, tone, and overall appearance
Palmitoyl Oligopeptide	Acts as a messenger to signal collagen renewal, offering benefits similar to retinoic acid but without the associated irritation
Palmitoyl Pentapeptide-3	Stimulates the production of collagen and other key components of the skin matrix for reduced wrinkles and improved skin firmness and elasticity
Acetyl Dipeptide-1 Cetyl Ester	Targets skin sagging to help lift and firm the skin
Dipeptide-2 + Palmitoyl Tetrapeptide-7 (Blend)	Works synergistically to reduce puffiness and circulation around the eyes

Damage Repairs

Peptide Name	How it Works
Pentapeptide-18	Moderates neurotransmitter release and muscle contraction to reduce the depth of wrinkles caused by facial expressions, especially in the forehead and around the eyes
Pentapeptide-18 + Peptide AC-29 (Blend)	Works synergistically to strengthen the extracellular matrix (ECM) and support structural integrity
Tripeptide-9 Citrulline	Protects the skin's DNA from the damaging process of glycation to preserve skin health and appearance
Tripeptide-10 Citrulline	Mimics decorin in the Dermal-Epidermal Junction (DEJ) to improve skin structure and firmness.

Even & Brighten Skin Tone

Peptide Name	How it Works
Hexapeptide-10	Redensifies and firms mature skin to enhance overall texture
Acetal Tetrapeptide-22	Protects against environmental stressors like travel
Acetyl Dipeptide-3 Aminohexanoate	Boosting the skin's natural defense mechanisms against microbes, enhancing its ability to protect itself from external irritants
Acetyl Dipeptide-13 Diphenylglycine	Targets skin sagging to improve firmness and elasticity
Acetyl Hexapeptide-8	Botox-like effect that reduces the appearance of wrinkles by inhibiting muscle contractions that cause expression lines
Acetyl Hexapeptide-30	Reduces wrinkles by limiting neurotransmitter release at the neuromuscular junction, essentially relaxing the muscles under the skin

Firming, Strengthening, & Hydrating

Peptide Name	How it Works
Acetyl Hexapeptide-37	Enhances moisture retention for improved hydration and a plumper appearance
Acetyl Hexapeptide-38	Plumps fine lines and wrinkles
Acetyl Hexapeptide-39	Targets cellulite by reducing fat accumulation in the cells
Acetyl Hexapeptide-49	Soothes and reduces skin inflammation to protect against irritants and environmental stressors
Acetyl Hexapeptide-51 Amide	Reduces wrinkles and signs of aging by enhancing DNA repair mechanisms
Acetyl Tetrapeptide-2	Lifts and tightens sagging skin to improve overall firmness
Acetyl Tetrapeptide-5	Combats undereye puffiness and improves elasticity around the eyes
Pentapeptide-18 + Acetyl Hexapeptide-8 (Blend)	Enhances and prolongs the wrinkle reducing effects of Botox treatments
Acetyl Heptapeptide-4	Strengthens the skin's barrier and supports the microbiome to enhance the skin's natural defense mechanisms
Heptapeptide-6	Protects the skin from external stressors to preserve health and appearance
Heptapeptide-7	Supports skin regeneration and healing by enhancing the skin's ability to repair itself
Tetrapeptide-14	Provides anti-inflammatory benefits to soothe and calm irritated skin
Tetrapeptide-21	Activates collagen production and enhances skin elasticity for a firmer skin texture
Pentapeptide-25	Targets cellulite by reducing fat accumulation in the cells to smooth and improve skin texture

Skin Protection

Peptide Name	How it Works
Tetrapeptide-30	Targets hyperpigmentation and age spots to even out skin tone and reduce the appearance of acne scars
Tripeptide-32	Optimizing the skin's natural repair processes to reduce signs of aging and improve overall skin health and appearance
Tetradecyl Aminobutyroylvalyl-laminobutyric Urea Trifluoroacetate	Boost hyaluronic acid renewal to maintain hydration and firmness
Palmitoyl Dipeptide-5	Enhances the interaction between the skin's layers, leading to improved firmness and structural integrity
Palmitoyl Tripeptide-5	Stimulates collagen production in the skin to reduce the appearance of wrinkles and improve overall skin firmness and texture
Pentapeptide-3	Mimics the effects of Botox to help reduce wrinkles and fine lines
Acetyl Octapeptide-3	Reduces wrinkles for a smoother, more youthful appearance
Dipeptide Diaminobutyroyl Benzylamide Diacetate	Botox-like effect that reduces the appearance of wrinkles, expression lines, and crow's feet
Acetyl Glycyl Beta-Alanine	Brightens the complexion by inhibiting melanin production and reducing hyperpigmentation for a more even skin tone
Oligopeptide-24	Anti-wrinkle peptide that mimics Epidermal Growth Factor (EGF) proteins to stimulate skin cell regeneration
Oligopeptide-34	Decreases melanin synthesis to brighten and reduce dark spots for a more even skin tone
Oligopeptide-51	Reduces age spots and hyperpigmentation for a more even complexion
Acetyl Decapeptide-3	Stimulates collagen and elastin synthesis for improved skin elasticity
Acetyl Tetrapeptide-9	Enhances collagen production to improve firmness and reduce fine lines
Acetyl Tetrapeptide-11	Boosts collagen synthesis in the dermal-epidermal junction (DEJ) to increase firmness and structural integrity
Acetyl Tetrapeptide-15	Reduces reactivity to soothe sensitive skin and reduce redness and irritation
Acetyl Tetrapeptide-40	Provides anti-inflammatory benefits to reduce redness and soothe and calm the skin
Pentapeptide-34 Trifluoroacetate	Acts as an antioxidant to protect skin from oxidative damage and aid in repair
Diaminopropionoyl Tripeptide-33	Protects skin DNA from damage caused by UV radiation, preventing signs of aging and maintaining skin health

Wrinkle & Fine Line Reduction

Peptide Name	How it Works
Tetrapeptide-26	Repairs the skin from UV damage, helping reduce signs of aging caused by sun exposure
Hexapeptide-3	Repairs and regenerates the dermal layer to enhance the skin's overall health and appearance
Hexapeptide-9	Reduces the appearance of wrinkles by promoting skin regeneration and repair
Hexapeptide-4	Protects against DNA damage caused by UV exposure to prevent signs of aging
Hexapeptide 11	Improves skin elasticity, firmness, and hydration to reduce the appearance of wrinkles
Triptide-29	Boosts collagen production to maintain the skin's structural integrity and youthful appearance
Nonapeptide-1	Brightens the skin and reduces dark spots for a more even complexion
Palmitoyl Triptide-36	Provides anti-acne and anti-microbial properties to support acne-prone skin
Palmitoyl Triptide-38	Stimulates the synthesis of six key building blocks that make up the skin's structure and dermal-epidermal junction, enhancing skin smoothness and reducing wrinkles
Copper Triptide-1	Promotes skin regeneration and healing, with anti-inflammatory and antioxidant properties
