

The gold standard of accuracy in the lab industry

The CardiaX test is a powerful tool for detecting genetic polymorphisms associated with cardiovascular disease, hypertension, diabetes, insulin resistance, atrial fibrillation, chronic cerebral ischemia, and dyslipidemia.

CardiaX Markers List

CardiaX includes the following genetic SNPs (single nucleotide polymorphisms):

CardiaX Markers	
9p21	CYP4F2
4q25	COMT
1q25	CYP11B2
ApoE	GSHPx
MTHFR	Apo A2
CYP1A2	CYP4A11
Corin	ApoC3
NOS3	ACE I/D
ADR-B2	SCARB1
AGTR1	Apo A1
6p24.1
