

The gold standard of accuracy in the lab industry

The Connective Tissue Disorders panel detects well-established CTD serological markers, antinuclear antibodies and autoantibodies, extractable nuclear antigens, and additional disease-specific markers.

Vibrant™ ANA IFA	ENA Profile-10	Rheumatoid Arthritis Associated markers	SLE Associated marker
Speckled	Jo-1	Vibrant™ RF IgM	Anti-dsDNA
Nucleolar	Sm	Anti-CCP3 IgG/IgA	
RIM	RNP		
Cytoplasmic	SSA (Ro)		
Centromere	SSB (La)		
Homogeneous	Scl-70		
	Chromatin		
	Centromere		
	Histone		
	RNA polymerase III
